- Assembly
- Packaging
- Shipping/just in time

Production:

- Fixture construction
- Small and large series production
- Reworking

Installation:

- Disassembly for recycling
- Preassembly and final assembly
- Parts/assembly group production

When is outsourcing profitable and which company divisions can increase effectiveness through outsourcing?

Our many years of experience in the industry and objective outside perspective enable us to provide you with expert advice on the subject and offer you customized solutions.

With our diversified spectrum of expertise in quality checking, we can assist you with any kind of money-saving measure imaginable from A to Z.

Whether we're acting as an objective „third-party test point“, economic outsourcing partner for parts or series

production, or reliable „firefighters putting out fires“ with expert troubleshooting - our clients know they can place their trust in our expertise and range of services.

It's no accident that since our foundation in 1991 we have never disappointed a client, but continue to pleasantly surprise them. The unwavering reliability of our quality management system is the foundation for our success. We are certified according to DIN EN ISO 9001:2008.

A close-up photograph of a person's hands using a digital depth gauge to measure a metal component. The gauge's digital display shows the number '1492'. The background is a blurred industrial setting.

Take advantage of our uncompromising quality standards in all areas.

Quality Assurance

- Checking and measuring according to specifications
- Reading work
- Error checking according to catalog and design
- Documentation of inspection reports
- Incoming and outgoing goods inspection
- Thorough final inspection

Working and Fabrication

- Reworking
- Disassembly for recycling
- Preassembly and final assembly
- Parts or assembly production
- Small and large series production
- Fixture construction

Packaging

- Assembly
- Labeling
- Sealing
- Packaging according to parts list
- Collective packaging
- Special packaging
- Blister packaging

Storage and Shipping

- Order picking storage
- Kanban and consignment stock system
- Ship to line service
- Just in time shipping
- High rack storage with 4000 pallet storage spaces
- GDI inventory software with SAP interface

Quality is our top priority.

Almost all of our customers are rated as grade A suppliers. For us, this is as much a standard to live up to as it is an incentive.

Practical, open communication forms the foundation for the success of both our collaborative relationship with our clients and our internal performance-oriented teamwork.

Further aspects important to our clients are technical equipment and qualified employees, from packagers to quality inspectors and skilled workers to operations

planners. And finally, it is important to be able to see that employees have a sense of well-being. We work to ensure this by providing light, well-ventilated rooms, ergonomic workstation setup, practical resources, and the necessary peace and quiet. This facilitates the concentration necessary to achieve optimal results. Using the „zero error method“ we work on giving you as much freedom from error as possible, thus preserving your grade A supplier status.

Outsourcing with bastian is an investment in your quality standard.

Hardware

- High-tech testing equipment
- Modern production facilities
- High-performance machines in the shop
- Packaging machines
- Proprietary fleet of cars

Infrastructure

- Freeway access A8 and A6
- Access to B10 (Karlsruhe) and L700 (France)

Basic data

- 80 employees
- 8,000 sqm operational space

Qualifications

- Skilled workers such as lathe operators, milling technicians, or welders
- Internal training to become a quality inspector
- Coaching provided by a QM consultant
- Further education following a training and qualification plan
- Employee self testing program
- Certified according to DIN EN ISO 9001:2008

We act as a reliable and steadfast partner for our clients. During this process, mutual appreciation forms the basis for a trusting collaboration - internally as well as externally.

Outsourcing always makes sense when internal processes are overstrained or you are up against a task requiring skills outside of your core competencies. You can entrust us with everything through to series production of parts and assemblies so that you yourself can concentrate on taking care of your core business. Even when it gets serious and you are in danger of losing

your grade A supplier status, perhaps after receiving a complaint against an entire shipment, we will be there for you. We will take charge of a full check, sort, and reworking for you.

Quality assurance

- Checking and measuring according to specifications
- Reading work
- Error checking according to catalog and design
- Documentation or inspection reports
- Incoming and outgoing goods inspection
- Thorough final inspection

Our employees are what allow us to maintain our high standard of quality.

What Makes us Tick - Dedication

- Good teamwork
- High motivation
- Always ready to serve
- Personal contact
- Collaboration based on trust

Efficiency

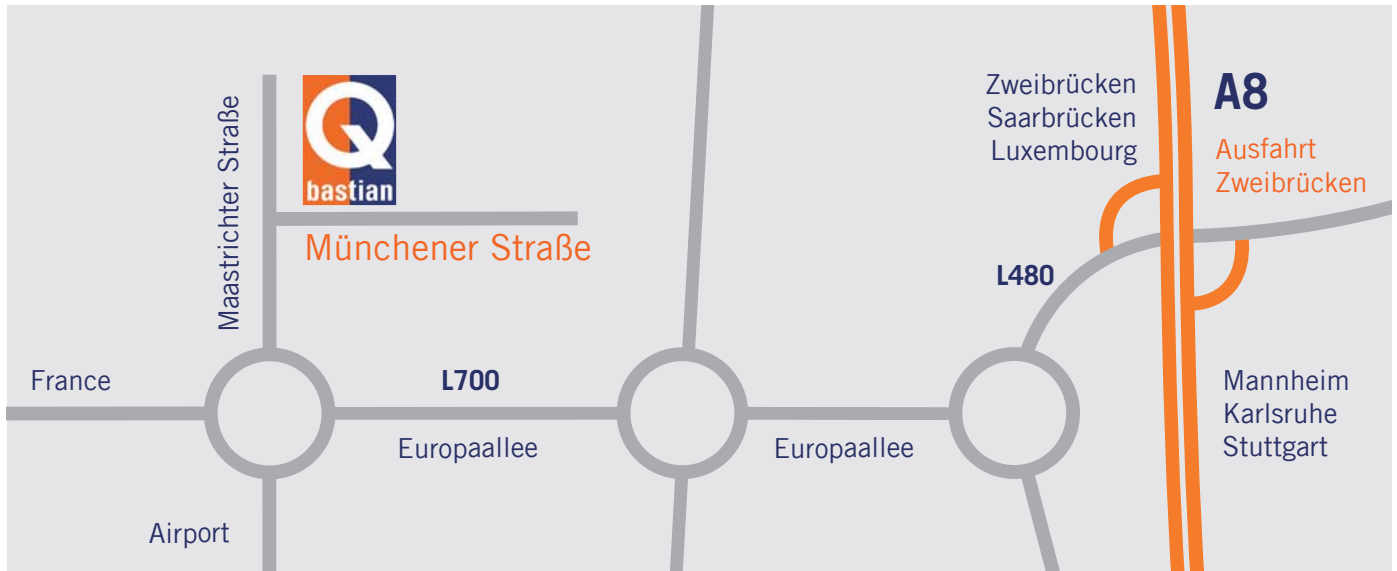

- Domestic outsourcing for savings of up to 50%
- Advantageous complete solutions
- Minimal error rate, reduced follow-up costs
- Precision and process security

Flexibility

- For rush projects: pickup and execution on short notice
- For complex projects: collaborative preparation and speedy implementation
- Professional processing of large and small projects alike
